A Scintillating Event

for Phi Beta Kappa Members and Guests

The Ever-Changing Cosmos

We present a rare opportunity to explore our evolving understanding of our always mysterious universe. From our location on a remote arm of the Milky Way Galaxy, we peer into space, searching for answers to long-pondered questions. Are we alone in the cosmos? how many other worlds exist? Are any like our Earth? And where–or does–our universe end?

Now we can explore these age-old questions under the starry sky of the Davis Planetarium. Our guide will be Jim O'Leary, lead space and astronomy specialist for the Maryland Science Center. Jim often serves as astronomy and space science expert on radio and TV, and for 12 years hosted the weekly *Skywatch* program on WYPR. This, therefore, is an unusual opportunity for our group to immerse ourselves in the amazing universe surounding us, and to have our questions answered by one of the most knowledgable explorers of this universe.

DATE: APRIL 29, 2018
ARRIVAL: 5:30 PM, event ending at 7:30 PM
PLACE: Science Center Planetarium, 601 Light Street, Baltimore, MD 21230
MEMBERS' FEE: $10.00 (special price for our group; normally $24.95)
GUESTS $15.00 FREE PARKING at the Science Center parking lot
Mail checks to Phi Beta Kappa Alumni Assn, P.O. BOX 5581, Towson, Maryland 21285 or else make payment through PayPal on our website link:
